ObjectARX is itself based on a framework called AWA (AutoCAD Serial Key Automation Library) first made available to the public as Autodesk Exchange. Autodesk Exchange, in turn, is based on an open source product called AWA. AWA had been acquired in 2008 by German startup Windfall Games and was subsequently open-sourced as a public-domain project in 2009. ObjectARX was released with AutoCAD For Windows 10 Crack 2010 for Mac and PC, however later, 2010, it was also released for the iPad, iPhone, iPod Touch, Apple TV and iMac. AutoCAD Civil 3D AutoCAD Civil 3D is a commercial software application for creating civil engineering documents. AutoCAD Civil 3D was first released in 2001 for Windows, and was later released for Windows, macOS, and Android in 2006, replacing the previous AutoCAD Civil. AutoCAD Civil 3D was discontinued as a standalone product in May 2016. AutoCAD Civil 3D, like other AutoCAD products, supports DXF, DWG and DGN import and export. AutoCAD Architecture AutoCAD Architecture is a discontinued program that allowed users to produce a number of architectural design documents, such as: site plans, elevation drawings, and plans. The program also allowed users to create 3D visualizations. Unlike other AutoCAD programs, however, it was developed independently from the AutoCAD product and does not share the same name. AutoCAD Architecture was discontinued in 2011. When AutoCAD Architecture was purchased by Autodesk in 2007, the new ownership was interested in maintaining the independent development of AutoCAD Architecture and transitioning it to a Mac application. This was made possible by creating an open-source version of the program that was completely independent from the Windows application and took advantage of Mac OS X's Cocoa technology. The Mac application was then integrated with AutoCAD at the AutoCAD User Group conference in 2008. The new version was released in May 2009, with the last Windows version released in September 2009. AutoCAD Architecture for Mac and Windows received updates until 2016, when the last version, 2.0, was released. AutoCAD Architecture 2.0 was discontinued in May 2016. AutoCAD for Architecture AutoCAD for Architecture is a discontinued program for architecture that has been described by Autodesk as a " a1d647c40b
