PowerPoint Password is an advanced, easy-to-use application that can help you retrieve lost passwords to Microsoft PowerPoint presentations. It supports three attack modes, enables the configuration of different settings for each mode, and offers command-line options that let you check file name, file type, and file extension. **PowerPoint Password Product Details: Platform: Windows 10, Windows 8.1, Windows 8, Windows 7 SP1, Windows Vista SP2, Windows XP SP2, Windows XP, Windows 2003, Windows 2000 Mac License: Freeware Meta** I decided to sit down and clean out my trade area folders, and came across some old trade area lists dating back to 2004 that I didn't think I could make use of at this time. These are all of my sites, so there are a lot of links and information, but I would suggest that most of you have both similar sites and ones different in ways that can be useful to you. I'm going to add only one category today, and that is sites that are "on the move". They're moving, in various ways, but they're on the move as a viable business. Here are some examples: **Phil's Web Design** This is a site for a web developer that has been doing business since the mid 90's. He's now trying to move away from agency and self-employment to the point where he can build his own business. This is a challenge he's pursuing with a lot of enthusiasm, and he has a number of years of experience he can now apply to this effort. **Your Smalls** This is a "tiny-store" type of website. I don't know what the person is trying to sell or make money on, but they have a ton of great examples of sites that can be based on this model. It's not the original thought, and in some ways it's dumb, but it's a good model for design and implementation. This is a secondary site for me that I never used, but it's a good example of how some of these ideas can be used for purposes other than selling stuff. It's all stuff and stuff, but it was an interesting work-in-progress to get here. Let me know what you think, or who I should add to this list in the comments.
