I've made a game on the Oculus rift and I want to publish it to the Steam store. Is it easy to do or are they only for non-game companies? A: I've been trying to figure out how to make an indie game for a month now. I've had a lot of time to play around with this, including trying the commercial stuff from indiedb.com to see how the game was selling on steam and other sites. And ultimately...No one wants to publish your game :(It took me like $25 to ship that game, as it was coded in Java. A small electrical explosion forced me to the couch, and I was laying there for about two hours. I feel for a change I did not have to wait until the law finally came - they came almost immediately. It was 3:30 p.m. I am just getting home from work and I am not a little nervous. The door was open, but I thought whoever was there may have just come by because they knew I was there. I walk into my home, which is kind of cramped because I have to walk through a kitchen and down a short, narrow hall. As I'm walking through the kitchen, I hear the sliding glass door being opened. What's next, I thought - a false alarm from someone who thinks there's something to be found in my home while I'm not there? I'm thinking, this can't be good, but for all I know, this is just a neighbor who comes in and out. I begin to say a quick prayer in my mind. I'm standing in my living room and I hear a noise. I know something is up with someone at my house. I turn around and my heart stops dead in my chest as I see a young black male wearing dark pants with black tennis shoes, a white T-shirt and black hoodie, peeking over the gun rack in
