Adobe Photoshop's basic features include tools for image creation, photo retouching, image compositing, illustration, canvas drawing, and design. Note: This tutorial covers basic Photoshop skills and is suitable for intermediate and advanced users. Need help? Want to get hands-on? Check out our video tutorials, webinars, and training packages. You have two choices, the only difference being the file compatibility. Photoshop is available in a regular desktop and portable version. In terms of performance, the standalone Photoshop is comparable to the Windows version of Photoshop and has some of the same features. The Photoshop portable version is not much slower. After installing Photoshop, you need to open the program or click on the icon to start using it. In the Windows version, choose Start, Type "Photoshop" in the search bar, and select Photoshop from the results. Setting Up Your Computer Before going any further, it's important to set up your computer to work with Photoshop. As you know, there are two versions: Photoshop and Photoshop portable. The two share much the same features so the two are basically the same. The only difference is the file compatibility and the installation disc type. How to install the Photoshop program depends on the version. For the Photoshop Windows version, you can install it by downloading the installation disc and creating a new installation. To do this, click on the disc link in the installation instructions. In the portable version, you don't need to download an installation disc. You simply install the program by opening the folder. Note: The instructions in this section refer to Photoshop CS2 for Windows. Adobe Photoshop CS2 is still the most advanced version, but it's very similar to CS6. CS5 will be obsolete, so this tutorial won't work.

Installing the Photoshop Program on Your PC Download the Photoshop program and follow the installation instructions on the program CD or website. Make sure that you install all the required updates. Setup Your New Photoshop Window When Photoshop starts up, it creates the Photoshop window. You'll use this window for managing your projects. Click on the Window button at the bottom left, and change the window settings to match your preferences. You'll see the General tab first.

Change your General window settings to match your requirements and preferences. A general preference is to set your Windows background as a solid color rather than having a pattern or gradient.

we join with the Senate and say, 'Senator Udall, thank you. Thank you very much. In these very important matters of public health, I've been waiting for 25 years to see the U.S. get this right. We are absolutely behind your efforts.'" Take heart, Americans. We can still vote for a person with integrity. Nice try, Kerry. I'd love to see you and Udall marching outside of the Senate with signs. But you can't make Udall do that. He's not some lackey for the U.S. Department of Health and Human Services. We all know he's a proud member of the Colorado wing of the Republican Party. It'd be a lot more convincing if you marched with the liberal Democrats. 6 comments: Nice post and great post and choice of quotes. I agree with you and I totally get why he did this. As I said, "I should be able to do things like this...however, you can't make people do that." It always reminds me of the show Seinfeld. Some character is arguing with George. The argument is that a person's free to do whatever they want. The person replies, "Yeah, but you're not making me do it." It's funny, I just attended a memorial

service for a good woman who died several years ago. While the other local Democrat was talking about me, I looked up and said, "That's the woman who's opinionated, outspoken, and happy to use the Constitution to do the right thing." This woman's family nodded in agreement and I laughed out loud. It is another example of this world working out like a Shakespearean tragedy. Follow by Email
