Application Programming Interfaces (APIs). API versions of commands are listed in the Help system and on the menus. For example, selecting Advanced-Palette in the application and selecting Edit-Keymaps shows the user the available APIs that the selected command is made up of. There is an online wiki that lists the AutoCAD APIs. AutoCAD previously supported the 3ds Max file format, which is still supported by Autodesk Fusion 360. As of 2018, the ability to import and export 3ds Max files from AutoCAD is not available. History Versions AutoCAD was initially released for the Macintosh. Edit a Polyline in 3D with Polyline Enhancements 3D solids are the backbone of your design, helping you visualize how your parts fit together. Polyline Enhancements lets you edit polylines in 3D using the same techniques that you're familiar with in AutoCAD. This will help you create accurate, dimensioned design intent more efficiently, quickly, and accurately. (video: 1:50 min.) New in Drafting & Dimensioning Creation Wizard:

Automatically create common objects and surfaces. Use the newly added Creation Wizard to create common solids, like cylinders, plates, cubes, spheres, and more. This wizard can be added as an extra step in the drawing creation workflow. (video: 1:25 min.)

**AutoDimension:** Convert 2D dimensions to 3D with AutoDimension. This new command makes it possible to easily create dimensioned drawing components, including tables, on-screen, and within AutoCAD drawing files. The main interface has been redesigned for greater simplicity. (video: 1:36 min.)

**Drafting & Dimensioning Polyline Enhancements:** Edit polylines in 3D with Polyline Enhancements. This new feature will help you visualize how your parts fit together in 3D. Polylines will be highlighted when the parts are rotated, so you can easily see if dimensions are on the right spot. Faster dimension editing

You can now draw directional arrows between dimensions, and set them to appear automatically in the drawing. Add more visual and functional dimensions with dynamic arrowheads, dimension links and multiple handles, which can be repositioned with a click or by dragging. Improvements in dimension drawing: get more accurate dimensional links, set dimension placement on-screen, and build your design in a single click. (video: 1:50 min.) Dimension settings: Replace the default 5 degrees of visual alignment with new 15-degree visual alignment settings. The new settings give you better control of where parts are placed on the screen.
