Savage Worlds: Adventure Edition is a fast-playing, cinematic, grittier fantasy roleplaying game that uses three unique advantages over most other systems. Each player is represented by a distinct character class, and special rules and abilities allow those characters to act in a cinematic, inter-personal fashion using basic tools like a melee weapon or magic wand. Combat is represented by a simple dice pool mechanic that allows all-round players to fight or roleplay, giving everyone the chance to contribute! This free RPG is perfect for running your own blockbuster adventures, or taking on tabletop like the pros! About the Author: For the first time ever, the Adventures Playbook for Savage Worlds presents a free conversion from our commercial product, and works with a subscription model. It is also the first time that the entire manual has been given away in PDF format! Most of the adventures listed in the pdf are already playable using this file, with no need for additional purchases. Just click the below link and start adventuring: For more information on the product, visit the Official Page. In this free conversion the pdf manual and the d6 module have been separated into different files to encourage reading. - As an added incentive to encourage reading the pdf, the Adventures Playbook is available as a special version exclusively for worldbuilder's: the Worldbuilding Toolkit. As an additional offer, the adventure conversion is included in the Adventures Playbook at a reduced price. This free conversion is the only one that allows the use of the worldbuilding toolkit. - Additional formats are also available on the support page. - The complete adventures can also be generated and imported to a Savage Worlds system using our toolkit. Table of Contents Table of Contents Chapter 1: Introduction to the Companion Chapter 2: Edges Chapter 3: Weapons Chapter 4: The Sourcebook Chapter 5: Spells Index Sample Playtesters: With this exciting new edition, we bring to the tabletop a unique and exciting adventure for you to delve into! You've heard of epic dragons and epic demons, but have you heard of the vaunted epic bees? These monsters can only be found in the most exotic of dungeons. And while the dragons and demons have passed into legend,

Dive into the universe with five characters that play differently from one another, each with their own unique weapons, ability, methods of moving and attacking, and hard to master tactics. Choose your favorite character and use your special skill, such as time-stopping, to manipulate objects. Each character has 3 unique weapons and can collect and equip up to 4 body parts. Each level features 50+ challenging puzzles and you need to save a combination of 3 items that increase your score in a limited time. Feel like the underdog with a single player challenge, or team up with friends to defeat the bosses. But beware: your opponents can use their special skill to manipulate things around them as well, so in a race against time it's not a fair fight.Features Fantastic gameplay, and controls designed for a console experience. Five incredible characters, each with their unique strengths and powers. A rich story to discover. Customize your character and your weapons with 20+ pieces of Gear. The first time 20+ character Skins to customize your character. You can play with your mouse alone, using a keyboard, or using an Xbox controller. The game includes 5 stunning songs to listen to and play in-game, and a whole battery of audio-visual surprises. Boss challenge: Rematch any boss to get better total times, and discover bonus features in each level. Secret: You can play in Practice mode without the boss fight and find surprises before it begins. Soundtrack by Ionut Georgescu of MutelnSubs. About Us Stoppa is the company behind this game. What's new in Galactic Feud:

: The 8th Scoop So I just took a break from writing the 8th scoop on our most recent war with the Corporate Federation to switch gears and write a bit about the scientific underpinnings of Star Trek. I have already written some about the Star Trek universe in other context, such as in my post about Star Trek’s Connection to Scottsdale. So what, then, can science teach us about Star Trek and its philosophy? As you have heard me say before, it really depends on what you do with this science. If you look at Star Trek as the purest form of future fantasy—a world where the rules and laws of society have been turned upside-down so that friends become foes and enlightenment means the knowledge of how to destroy the universe—then it is good to sit back and think about how it would be possible for a world like this to be created. If you look at Star Trek as a reflection of our own dark past, then it is good to look at it and make our own judgments about the behavior of those who would have torched our world and done good things while doing so. And if you look at it as a mirror of what we would be capable of if we were free from societal and cultural constraints, but not prohibited from trying it, then it is good to sit back and question if the constraints of society and culture really mean that much in this galaxy. I tend to look at Star Trek in the purest form. Does that make me more rational? Maybe not, but it is close to what I consider truth. Whatever I did write on science is primarily to illustrate how I play with sci-fi/fantasy, and it is my favorite! So you can call me a hypocrite if you want, but at least I am one who practices what I preach. Take any one of these topics and from it you can learn something. For example, we have been talking about the views of the Federation towards interplanetary travel. We'll approach that from a theoretical angle about wave-particle duality. Some people say the photon is both a wave and a particle. Others say that the photon is a particle and not a wave, because the waves that make up the photon itself are minute. Everyone agrees that the photon is both a particle and a wave simultaneously, but they disagree about which aspects are more prominent. Some say it is one, some say the other, and some say no, it is both.
