Join Ferrell and Reilly again in another over-the-top comedy as they take on the full-fledged role of animal control officers in the film that runs the gamut of the two men's comedic shtick. With the original film deemed lost forever at the beginning of the new millennium, this is the first time a new Zookeeper film has been made in over a decade. In an effort to save his zoo, Ferrell and Reilly, working with a much larger team than before, have to become the "interplanetary zookeeper" as more unusual and exotic animals crash into their park, requiring their services. The men try to save as many lives as possible, only to come across more exotic species and use the zoo animals as weapons to save themselves. Here's what people are saying about the movie: "Ferrell and Reilly are some of the best comedy actors in the world." - Arrow In The Head "Ferrell and Reilly's chemistry is undeniable. It's helped that the movie allows them to use skills they gained on the set of ZOEKEEPER." - FlickSided "The problem with this movie is that as much as I want to see everyone in this movie in close-up, there is nothing close up in this movie." - BooBoo Bells "THE ZOOKEEPER 2: FROZEN IN TIME is a film I will probably never see. It wasn't that funny." - Darth The wildest snowboard world champion who resides in the town of Alaska, knows that snowboarding is more than just a sport. ## Lone Survivor - Original Soundtrack Activator

"The last few days have proved conclusively that we live in a time of change. But before that change arrives, we get to look forward to one last chance to thrill, be disappointed, be happy, be sad, cry and cry some more. That chance is Modern Warfare 3, the latest in the American military shooter series that has become the gold standard for first-person games." The whole dark ambient part of the sound fits well with the theme of the game and especially the songs and the atmosphere of the game is great. The music is played entirely in the first-person perspective and all the instruments and the vocals are blended with robotic effects. No voice acting. The only thing I dislike is that all songs were made in 2 months. But that's not a disadvantage for a soundtrack it fits well with the music and the atmosphere of the game. The whole dark ambient part of the sound fits well with the theme of the game and especially the songs and the atmosphere of the game is great. The music is played entirely in the first-person perspective and all the instruments and the vocals are blended with robotic effects. No voice acting. 'Evil' also has quite a few songs I like. I haven't listened to them all yet, but going through the list I like "Vampire Girl" most of all, it really is such a great track. All the other songs are good too, though, and they all fit well with the game. I did really enjoy the soundtrack I heard on the internet. The first song really impressed me: "Side Effects of Free... We See the Storm" however I can't listen to it anymore as the bass is too heavy, and now I don't know where to find it. But now the screen is black and turns off, so it's impossible to play this game, it doesn't have a network connection. I will try another way to play it, in a portable device. And there was a detail with the video: I've downloaded it with Zune and after playing it I found that there is a version for Windows Media Player and to play it I had to manually download the following file "C:\Program Files\Microsoft Zune Music\mus\_c3d.wvx" 'Evil' also has quite a few songs I like. I haven't listened to them all yet, but going through the list I like "Vampire Girl"
