QuasiFractal Composer Description: This MIDI sequencer is based on the idea of generating complex tones out of multiple simple sine tones. Just wanted to let you know that after several months of beta testing and providing feedback on this software I now believe it's stable and ready for full release. Since it's difficult to track the whereabouts of a beta version, I thought I'd let you know about it here in case anyone reads this and is interested in giving it a go. There are two primary changes: The introduction of a "paint" mode for the score, so you can see the notes as you paint them. A few minor fixes (wrong text sizes, etc.) The paint mode makes most sense when using the phaser (the one that looks like a bow). It lets you paint a little "fan" of notes at a time and that also lets you pick up multiple notes at once if you want. The phaser is
