Do you need a cleaner and better Windows registry? Do you think that the performance of your PC is affected by registry errors? Then Professional Registry Doctor is the best choice for you! Using Professional Registry Doctor you can remove unused, outdated, corrupted, duplicate and invalid registry entries from Windows registry, as well as repair them. Other applications clean the registry from junk files, but Professional Registry Doctor removes all the junk files, which can slow down your PC and increase memory usage. Professional Registry Doctor can also find and remove all file associations that are incorrect or outdated. All the files that are found will be moved to the recycle bin so they will not be used anymore. Professional Registry Doctor can clean up your registry from invalid shortcuts, open programs, shortcuts, and programs that have stopped responding. It can also restore the image of the registry so the application keys, file associations, and everything else will get the same values as before they were removed. Professional Registry Doctor will allow you to set the priority for the scanned tasks: right now the priority can be High, Medium, or Low. You can also choose the frequency of the task execution: you can set daily, weekly, monthly or all. In addition, Professional Registry Doctor offers a handy feature that lets you run the program in the background so the PC won't be slowed down while the scan is performed. You can also choose the number of threads that will be used to clean the registry: Professional Registry Doctor can run several threads simultaneously. This way Professional Registry Doctor can scan the registry faster. Professional Registry Doctor's unique features such as the Find Duplicates feature, the option to create an exclusion list, the Automatic Upgrade feature, the Scanning Queue, Scheduling can save your time and efforts. Professional Registry Doctor have a comprehensive settings that allow you to customize every aspect of the application. You can also restore any of the settings to the default values at any time. All the changes are tracked and are also saved for later use. Advanced System Care Professional is a powerful utility that instantly scans, diagnoses and repairs any PC stability issue. It offers not only the standard utilities to clean and optimize the system, but also various additional features. First of all, Advanced System Care Professional offers the tool that will help you to improve the system's performance, clean the cache, manage the Windows Registry, and optimize system files. The application supports multiple languages - Czech, English, German, French, Italian, Spanish, Portuguese, Danish, Russian, Dutch
