Outland Rapture is a challenging and intriguing 3rd person adventure set in a fantastical world where 3 characters have awakened together and they need to work together. Outland Rapture features beautiful art style, a funny story, a nice and robust gameplay and an immersive soundtrack. February 5, 2017 // RELEASE // Windows, PC Outland Rapture on Steam Outland Rapture is a welcome addition to the Left 4 Dead franchise. The game combines three unique mechanics: platforming, Stealth and Horror. The game offers both single player and multi-player co-op. It takes place in a mysterious world, where players explore and deal with threatening and scary monsters and go through puzzles and obstacles. Episode 1 has you escaping from a dark and mysterious world. After waking up, you find yourself in a room where you can hear some strange noises coming from the other side. You need to figure out a way to escape and try to solve the mystery behind the place. It can be played as a First-Person Stealth game, where you go through the game in ghost mode, observing what's happening through walls and vents, or as a Third Person Co-op Story where you're one of 3 characters who wake up together and explore the world and its secrets as a team. Platformers: In this game you'll need to use physics based and rapid-fire movement mechanics to make the jump from one set-piece to another. If a block is on top of a jump you need to manage the timing between the platforms to make it to the next platform. If you jump while a block is on top of it, it will crash through the block and you will fall to your death. The longer you manage the jump the better. Stealth: Escape a mysterious dark place with only a flashlight and your stealth skills. You need to stay quiet and avoid the scary creatures that patrol the dark corridors. Set-piece: In this you'll need to make a risky jump into a maze of platforms and then go through them one at a time. You'll need to make it all the way through to the exit without causing the platform to crash. A block can be placed on top of the jump to not let you fall. Horror: In this section you'll need to manage your reactions when monsters attack and you need to use your reflexes and timing. You need to jump over the monsters or use traps to kill them or otherwise you'll be killed. This means the enemies

What's new in Underling Uprising:

VR - Extreme Pump Action Pistol 3.0 Riflesense brings you the latest news for the upcoming riflesense3 in the form of a test result report. Some of these slides are quite interesting but also quite scary in regards to the features. Shot by Dienchow. Batteries The VR guns and riflesense3 all use the proven good batteries from Airsoftzone 1 and 2. Magazine The VR guns and riflesense3 all come with both hybrid or traditional magazines in both sizes. The IQ size hybrid mag can connect to the rails when done right but the proof rifle access pipe interior can trap projectiles. The traditional magazines are good for evaluation to see if the riflesense 3 should use them for its rated shotgun. Expected for the riflesense 3 is also a one-size-fits-all magazine for all VR machines with pullback action. Bipod Riflesense3 uses the good VASTLY overpriced hybrid bipod from Airsoftzone 2 for the base station unit. No scale for this one. Expect these bipods for the whole riflesense series. (Subjective note: The IQ mags can use the base station bipod). Accessories Some accessories (see below) were announced for the riflesense3 and not the manufacturer of the rifle. Expect these to be available for all rifles in the series. Nitro-cap The nitro cap is mounted to the upper receiver, above the bolt carrier. Key Motion Adjustment The key motion is adjusted by moving the key rod sideways on the operation rod. TRS foam grip The TRS foam grip comes with the rifle and is fixed on the receiver. Sling Adaptor The integral sling adaptor can attach to the sling from Airsoftzone. Range Bag Except for the new graphics, the range bag of the riflesense 3 is unchanged from the previous model. Component Specs Twist and Drift Adjuster The twist and drift adjuster are the same as in the previous model. This is a welcome change as the previous model was metal rods which rusted out. Automatic étalon The autometric étalon for adjuster wand is the same as in the previous model. Mag release spring The autometric étalon release spring is replaced by a larger
