Paint.net plugin for Gaussian blur with controllable amount of opacity and blend modes. How to Install: 1. Copy the extension folder to \Program Files\Paint.net\Effects folder. 2. To make sure that you have installed it correctly, go to the \Program Files\Paint.net\Effects\Channel Blur folder. Check the icon there. Credits: 1. Icon by Shailesh Neeraj Patil; 2. Original 'channel blur' picture; 3. For restoring the picture after a 'undo' operation: How to set a minimum distance between existing markers and their cluster using ArcGIS Javascript API? I am developing a web map using ArcGIS Javascript API and I need to set a minimum distance between existing markers and their cluster in order to set a visible area. I need a function like minClusterDistance(existingMarkers, cluster) in Map. var currentCluster = cluster.getMapObjects(); var currentClusterPositions = currentCluster.getArray(); This function is available in leaflet but I don't know where I can find it. A: You can use the calculation query to achieve this. For example: var currentClusterPositions = currentCluster.getArray(); var distance = 10000; var distanceToCluster = 0; var query = new esri.tasks.Query(); query.where('distance < -1' | distanceToCluster = distanceToCluster + position.distance; } else { existingMarkers.push(position); } } query.returnGeometry = true; return existingMarkers; This

## What's New In Channel Blur?

CHANNEL BLUR is a small-sized plugin designed for Paint.net, which gives you the possibility to separately blur color channels. It supports multiple blend modes and can be asked to automatically utilize the alpha channel closest to opaque. It can be asked to generate watermarks (text, shape or image). It is fully customizable and can be used to add, remove or modify colors and masks. Installation: Please download the DLL file (one for PSD and the other for Photoshop), unzip and install it in the "Effects" folder of Paint.net. Note: All images imported into the image editor can be used without saving them in a separate file.
